

WORLD'S NEWS CONDENSED

The battle flags captured from the Oklahoma Rebels or the North Indians at the battle of Okemah via express for train dispatching on their way were returned by the capture.

A band of refugees who have been scattered in New York for the past six days have been reported as an independent authority that the government has been informed of the fact in the 100,000 of Indians who are scattered was in Fort-de-France.

Confederates, now the parents of persons who in the Southern birth have been massacred and here comes and others persecuted in Cuban, Panama and Bahia and the country for miles around is practically cut waste and people who have created by want are living in misery.

Death sentence of crime was charged with the murder of his father Judge James Harris was sentenced Thursday to life imprisonment. The defendant showed no emotion when he was led out to meet death. Neither did his mother and sister of whom he is the only child present.

The tower for the wireless station to be erected in Washington under the contract recently signed by the Secretary of the Navy is to be 450 feet high the highest structure on this continent. The tower will be of concrete, fifty foot in diameter at the base and eight foot at the top. The shaft will be hollow and will carry within it the wires required for passing messages 3,000 miles to ships at sea.

The heaviest locomotive ever built is now on the way to Chicago. It weighs 630,000 pounds without the tender and 805,000 with it. It is 82 feet long and is for service on the Santa Fe and mountain division of the Southern Pacific railroad. With the possible exception of one locomotive used on the Rio Grande, this is the most powerful locomotive in the world and is two and one-half times more powerful than the heaviest locomotive used by the Southern Pacific on its steepest grade. Coal oil will be used for fuel.

Rumors from the Roosevelt hunting camp at Nairobi, British East Africa brought the news of an incident in which Roosevelt saved the lives of two native hunters of the party who had strayed into a giant lion. The nearest gunpowder was being used as the hunters planned their horns, but Roosevelt quickly aimed his shot and killed the lion. The bullet went through its brain. The story is breaking fast to town for the Miami district where they will hunt giraffe. Roosevelt has killed three lions and one lioness, and Karoo and lion, a cheetah and a number of gazelles.

A fleet of Chinese battleships is coming to pay a friendly visit to the United States. Within three months it will be anchored in San Francisco harbor. The information is direct from Prince Tsai Fu, a son of the Chinese Emperor, and comes to Gen. P. Schuyler, engineer of the Downsville Association of San Francisco, who was recently decorated with the rank of the Double Dragon by Prince Tsai Fu. At least a dozen vessels will be in the fleet, and of that number more than half will be battleships. The yellow dragon, will float at peace in the waters of San Francisco bay, and as the blue and striped boats in Chinese robes, as a visible token of our friendly relations existing between the older government of the east and the most powerful of the west.

Some of the corporations that have been robbing the country have had a bad time of it recently and it is hoped they may take the lesson to heart. The American Sugar Refining Company has had to refund \$1,200,000 for cheating the customs by false weight, and the Union Pacific railroad, the Utah Rail Company and the Northern Pacific railroad have had to pay fines aggregating some \$2,000,000, and in addition disgorge many thousand acres of valuable coal land which now return to the public domain. All that is gratifying so far as it goes and it will have a great effect on other offenders, but the average man wonders why some of the officials were not imprisoned. If a private firm had used false weights and balances or stolen land the principals would have been put behind prison bars and would be wearing striped suits. Justice will not be adequately done until corporations and trusts are put upon the same footing as private firms or individuals.
